Recent

Site redesign of Sys411.com using WordPress as the primary development platform while including PHP mods, javascript, JQuery, and Bootstrap framework elements. The underlying WordPress theme has been reused for commercial CMS sites. Working with a client implementing WooCommerce ecommerce install.

Created a CMS real estate site focusing on the location, location, location aspect of real estate ownership. The Tanglewood.gallery was developed using the Cloud9 development environment, based on the Node.js runtime ecosystem. The site depends on javascript, Express, Mongo DB, HTML5, mongoose, and git. The final product runs on the Heroku cloud utilizing Amazon S3 for static images and mlab for online Mongo database deployment.
